PROJECTS

AWAAS - Vacation Rental Platform ↗ Nov 2024 - Dec 2024 A dynamic MERN stack web application for property listing and rentals, featuring listing management, editing, image uploads, and a review section for seamless owner-renter interaction.	RakshAI - Deepfake Detection Platform ↗ Aug 2024 - Sep 2024 A project Made for SIH '24, Raksh AI is a Deepfake face swap detection model made using CNN ResNext model and Long short term memory. Significantly contributed to building the frontend of the platform.
Aider - Emergency Healthcare Assistance Platform ↗ Jan 2025 - Present Aider is an innovative emergency healthcare assistance platform designed to streamline the patient registration process in critical situations. Built using the MERN stack, Aider features a user-friendly interface where patients can quickly register their emergency details, which are then displayed in real-time to healthcare respondents. The project includes an admin dashboard for hospitals to manage patient data efficiently. Aider aims to enhance the responsiveness and coordination of emergency medical services, ensuring timely care and support.
